Quantities, averages and word problems

Day 02 • 2026-10-30 • 9:00 AM–10:15 AM

15 questions. Show your method and include units. For multiple choice, enter A, B, C or D. Follow your instructor’s calculator guidance.

Name _____ **Date** _____

Type into the fields and save a copy, or print and write.

READ & REASON

01 When checking an average in Numeracy Hub, which calculation should you enter?

A. Total × number of values

B. Total of the values ÷ number of values

C. Largest value − smallest value

D. Largest value ÷ smallest value

Numeracy Hub

Choice (A–D) _____ **Working / reason** _____

Textbook Chapter 1 pp.17–23

Quantities, averages and word problems

Day 02 • 2026-10-30 • 15 questions

02 A problem asks for the combined lengths of different pieces. Which operation is needed first?

A. Changing sign
B. Rounding down every piece
C. Addition
D. Square root

Choice (A–D)

Working / reason

Textbook Chapter 1 pp.17–23

03 What information is required to find the mean of five measured lengths?

A. The colour of the stock
B. Their sum and the count 5
C. Only the longest length
D. Only the shortest length

Choice (A–D)

Working / reason

Textbook Chapter 1 pp.17–23

04 Why should all lengths use the same unit before being added?

A. It makes every number smaller
B. Units are only needed at the end
C. The quantities must be comparable
D. Different units always cancel

Choice (A–D)

Working / reason

Textbook Chapter 1 pp.17–23

Quantities, averages and word problems

Day 02 • 2026-10-30 • 15 questions

05 What is a useful first step in a word problem?

A. Choose multiplication every time

B. Ignore the units

C. Type every number immediately

D. Identify the required quantity and given data

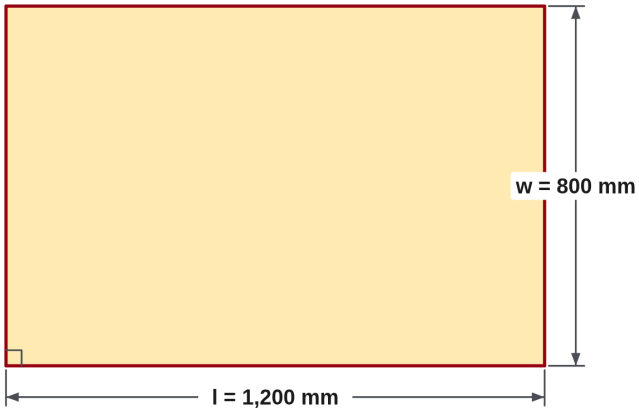

Choice (A–D)

Working / reason

Textbook Chapter 1 pp.17–23

CALCULATE

06 Use the labelled Shape Canvas lengths 1,200 mm and 800 mm. What is their mean?

Shape Canvas

Answer (mm)

Working / reason

Textbook Chapter 1 pp.17–23

Quantities, averages and word problems

Day 02 • 2026-10-30 • 15 questions

07 Three batches contain 48, 52 and 56 pieces. Find the mean batch count.

Answer (pieces)

Working / reason

Textbook Chapter 1 pp.17–23

08 Five equal kits use 135 screws altogether. How many screws are in each kit?

Answer (screws)

Working / reason

Textbook Chapter 1 pp.17–23

09 A crew fits 18, 23 and 21 brackets on three tasks. Find the total.

Answer (brackets)

Working / reason

Textbook Chapter 1 pp.17–23

10 A 2,400 mm rail is divided into six equal lengths. Ignore kerf. Find one length.

Answer (mm)

Working / reason

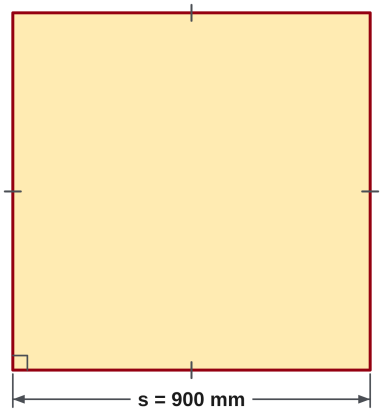

Textbook Chapter 1 pp.17–23

Quantities, averages and word problems

Day 02 • 2026-10-30 • 15 questions

APPLY & CHECK

11 The Shape Canvas square shows a 900 mm side. Five strips each match that side length. Find their total length.

Shape Canvas

Answer (mm)

Working / reason

Textbook Chapter 1 pp.17–23

12 A learner finds the mean of 40, 50 and 60 as 150. What step is missing?

A. Multiply by 3

B. Divide the sum by 3

C. Subtract the smallest value

D. Round 150 up

Choice (A–D)

Working / reason

Textbook Chapter 1 pp.17–23

Quantities, averages and word problems

Day 02 • 2026-10-30 • 15 questions

13 A delivery has 8 boxes of 24 hinges. After 57 are used, how many remain?

Answer (hinges)

Working / reason

Textbook Chapter 1 pp.17–23

14 The measured lengths are 498, 501 and 500 mm. Which mean is plausible?

A. About 5,000 mm

B. About 500 mm

C. About 1,500 mm

D. About 50 mm

Choice (A–D)

Working / reason

Textbook Chapter 1 pp.17–23

15 A job needs 14 braces for each of 9 frames. Five spare braces are also required. Find the total.

Answer (braces)

Working / reason

Textbook Chapter 1 pp.17–23
