Marking fractional dimensions

Day 07 • 2026-11-06 • 9:00 AM–10:15 AM

15 questions. Show your method and include units. For multiple choice, enter A, B, C or D. Follow your instructor’s calculator guidance.

Name _____ **Date** _____

Type into the fields and save a copy, or print and write.

READ & REASON

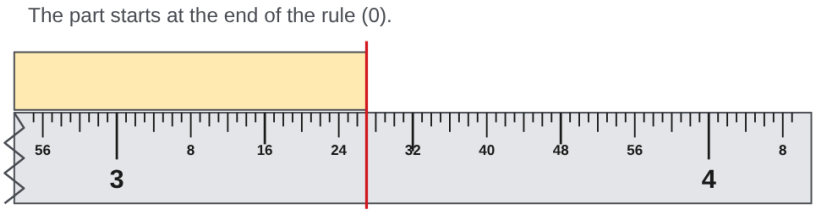

01 When transferring a dimension from Numeracy Hub or Shape Canvas to stock, what should determine the mark?

A. The browser zoom value

B. The width of the logo

C. The stated dimension, read with the physical rule

D. The measured size of the on-screen image

Numeracy Hub

Choice (A–D) _____ **Working / reason** _____

Textbook Chapter 4 pp.88–96

Marking fractional dimensions

Day 07 • 2026-11-06 • 15 questions

02 A mark must be 5 3/8 in from the end. Where should the fraction be counted?

A. After the 5-inch mark

B. After the eighth whole inch

C. After the 3-inch mark

D. From the far end of the rule

Choice (A–D)

Working / reason

Textbook Chapter 4 pp.88–96

03 Which fraction names the mark halfway between 1/4 and 1/2 in?

A. 5/8 in

B. 1/8 in

C. 7/8 in

D. 3/8 in

Choice (A–D)

Working / reason

Textbook Chapter 4 pp.88–96

04 Why should repeated marks use a consistent starting reference?

A. Whole inches cannot be measured twice

B. It removes the need for a rule

C. Changing the reference can shift every dimension

D. The tape becomes longer with each mark

Choice (A–D)

Working / reason

Textbook Chapter 4 pp.88–96

Marking fractional dimensions

Day 07 • 2026-11-06 • 15 questions

05 A drawing says the marked dimension is schematic. What does that mean for measurement?

A. Use the labels; the drawn size need not be to scale

B. Measure the picture with a ruler

C. Ignore every label

D. All lengths are equal

Choice (A–D)

Working / reason

Textbook Chapter 4 pp.88–96

CALCULATE

06 The pictured rectangle’s longer side is 18½ in. On a tape divided into eighths, what numerator labels the fraction after 18 in?

l = 18½ in **w = 7¼ in**

Shape Canvas

Answer

Working / reason

Textbook Chapter 4 pp.88–96

Marking fractional dimensions

Day 07 • 2026-11-06 • 15 questions

07 A mark is 9 sixteenth-inch intervals beyond 6 in. Record the dimension.

Answer (in) | **Working / reason**

Textbook Chapter 4 pp.88–96

08 A mark must be 4 3/4 in from the end. How many sixteenth-inch intervals follow the 4-inch mark?

Answer (intervals) | **Working / reason**

Textbook Chapter 4 pp.88–96

09 A mark is 5 eighth-inch intervals beyond 12 in. Record the full dimension.

Answer (in) | **Working / reason**

Textbook Chapter 4 pp.88–96

10 The drawing calls for 11 3/16 in. How many whole inches should be located before counting small intervals?

Answer (in) | **Working / reason**

Textbook Chapter 4 pp.88–96

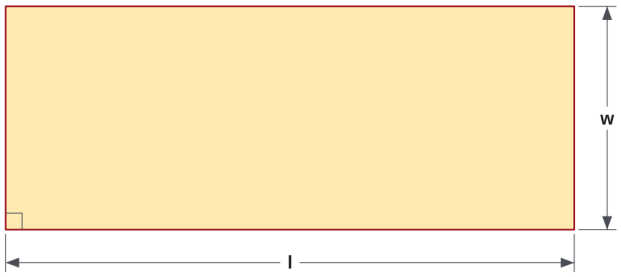

Marking fractional dimensions

Day 07 • 2026-11-06 • 15 questions

APPLY & CHECK

11 The pictured rectangle’s shorter side is 7¼ in. On an eighth-inch rule, how many small intervals follow 7 in?

l = 18½ in **w = 7¼ in**

Shape Canvas

Answer (intervals)

Working / reason

Textbook Chapter 4 pp.88–96

12 A learner marks 2 3/16 in instead of 2 3/8 in. Which statement is correct?

A. The two marks are equal

B. Only the unit is wrong

C. The mark is too long

D. The mark is too short because 3/16 is less than 3/8

Choice (A–D)

Working / reason

Textbook Chapter 4 pp.88–96

Marking fractional dimensions

Day 07 • 2026-11-06 • 15 questions

13 Which dimension is largest?

A. 5 7/8 in

B. 5 11/16 in

C. 5 3/4 in

D. 5 5/8 in

Choice (A–D)

Working / reason

Textbook Chapter 4 pp.88–96

14 A layout image is enlarged to twice its on-screen width. What happens to its 7¼-in dimension label?

A. It becomes a metric dimension

B. It still specifies 7¼ in

C. It now specifies 14½ in

D. It now specifies 3⅝ in

Choice (A–D)

Working / reason

Textbook Chapter 4 pp.88–96

15 Which record gives another worker the clearest marking instruction?

A. Mark five small lines somewhere

B. Mark 8 5/16 in from the left reference edge

C. Mark near eight

D. Use the picture width

Choice (A–D)

Working / reason

Textbook Chapter 4 pp.88–96
