Exact conversion factors and mixed-unit practice

Day 14 • 2026-11-24 • 2:15 PM–3:30 PM

15 questions. Show your method and include units. For multiple choice, enter A, B, C or D. Follow your instructor’s calculator guidance.

Name _____ **Date** _____

Type into the fields and save a copy, or print and write.

READ & REASON

01 Which exact relationship should you use to convert inches to millimetres?

A. 1 in = 2.54 mm

B. 1 in = 254 mm

C. 1 in = 30 mm

D. 1 in = 25.4 mm

Choice (A–D) _____ **Working / reason** _____

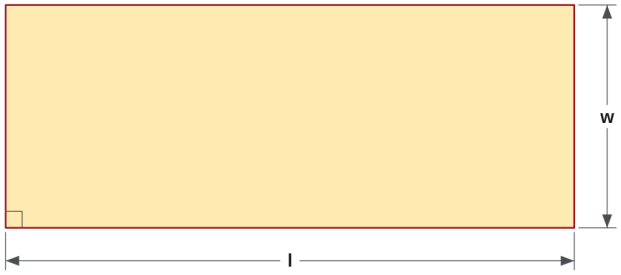

Textbook sections 7.3 pp.167–169; conversion factors pp.362–363

Exact conversion factors and mixed-unit practice

Day 14 • 2026-11-24 • 15 questions

02 The Shape Canvas rectangle is 18.5 in long. Convert the length to millimetres using 25.4 mm per inch.

l = 18½ in **w = 7¼ in**

Shape Canvas

Answer (mm)

Working / reason

Textbook sections 7.3 pp.167–169; conversion factors pp.362–363

Exact conversion factors and mixed-unit practice

Day 14 • 2026-11-24 • 15 questions

03 Using Numeracy Hub to check a conversion, which operation converts millimetres to inches?

A. Multiply by 1000

B. Divide by 25.4

C. Multiply by 25.4

D. Divide by 12

Numeracy Hub

Choice (A–D)

Working / reason

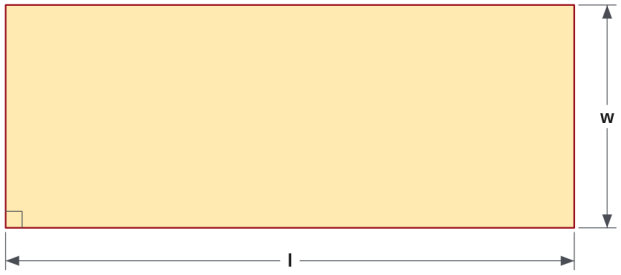

Textbook sections 7.3 pp.167–169; conversion factors pp.362–363

Exact conversion factors and mixed-unit practice

Day 14 • 2026-11-24 • 15 questions

04 The Shape Canvas rectangle is 7.25 in wide. Convert its width to millimetres.

l = 18½ in w = 7¼ in

Shape Canvas

Answer (mm)

Working / reason

Textbook sections 7.3 pp.167–169; conversion factors pp.362–363

05 When a mixed-unit calculation asks for a final answer to the nearest millimetre, when should you round?

A. After every key press

B. Before converting each measurement

C. Before adding the lengths

D. After the calculation is complete

Choice (A–D)

Working / reason

Textbook sections 7.3 pp.167–169; conversion factors pp.362–363

Exact conversion factors and mixed-unit practice

Day 14 • 2026-11-24 • 15 questions

CALCULATE

06 Convert 3.5 in to millimetres.

Answer (mm) | **Working / reason**

Textbook sections 7.3 pp.167–169; conversion factors pp.362–363

07 Convert 508 mm to inches.

Answer (in) | **Working / reason**

Textbook sections 7.3 pp.167–169; conversion factors pp.362–363

08 Convert 6 ft to metres.

Answer (m) | **Working / reason**

Textbook sections 7.3 pp.167–169; conversion factors pp.362–363

09 Convert 2 ft 6 in to millimetres.

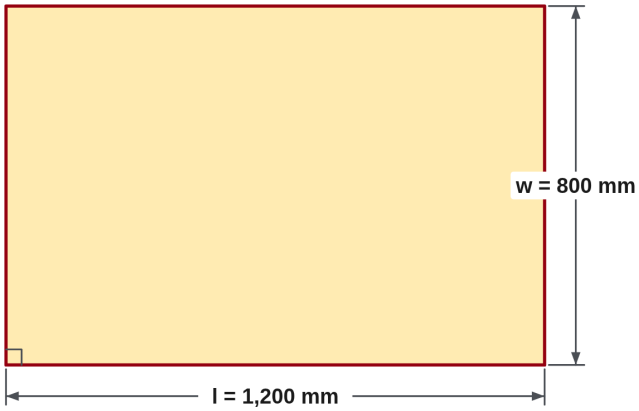

Answer (mm) | **Working / reason**

Textbook sections 7.3 pp.167–169; conversion factors pp.362–363

Exact conversion factors and mixed-unit practice

Day 14 • 2026-11-24 • 15 questions

10 Convert 1200 mm to inches. Round to 2 decimal places.

Shape Canvas

Answer (in)

Working / reason

Textbook sections 7.3 pp.167–169; conversion factors pp.362–363

APPLY & CHECK

11 A rail is 900 mm long and another is 12 in long. What is their combined length in millimetres?

Answer (mm)

Working / reason

Textbook sections 7.3 pp.167–169; conversion factors pp.362–363

Exact conversion factors and mixed-unit practice

Day 14 • 2026-11-24 • 15 questions

12 A student uses 25 mm per inch for an exact conversion. What should change?

A. Keep 25 because it is exact

B. Round every length to a whole inch

C. Use 25.4 mm per inch

D. Use 25.4 inches per mm

Choice (A–D)

Working / reason

Textbook sections 7.3 pp.167–169; conversion factors pp.362–363

13 A 1200 mm board needs a 20 in piece cut from it. Ignore kerf. What length remains in millimetres?

Answer (mm)

Working / reason

Textbook sections 7.3 pp.167–169; conversion factors pp.362–363

14 A drawing gives 3 ft 4 in. Record the length to the nearest millimetre.

Answer (mm)

Working / reason

Textbook sections 7.3 pp.167–169; conversion factors pp.362–363

Exact conversion factors and mixed-unit practice

Day 14 • 2026-11-24 • 15 questions

15 Which reverse check confirms that 762 mm equals 30 in?

A. 30 ÷ 25.4 = 762

B. 762 × 25.4 = 30

C. 762 ÷ 12 = 30

D. 30 × 25.4 = 762

Choice (A–D)

Working / reason

Textbook sections 7.3 pp.167–169; conversion factors pp.362–363
