Reading and substituting into formulas

Day 15 • 2026-11-25 • 12:45 PM–2:00 PM

15 questions. Show your method and include units. For multiple choice, enter A, B, C or D. Follow your instructor’s calculator guidance.

Name _____ **Date** _____

Type into the fields and save a copy, or print and write.

READ & REASON

01 In A = L × W for a rectangle, what does W represent?

A. Weight

B. Waste percentage

C. The area

D. Width

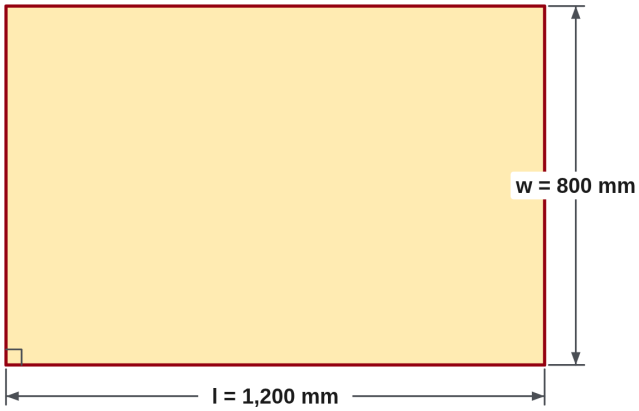

Choice (A–D) _____ **Working / reason** _____

Textbook sections 8.1–8.2 pp.192–194; formula sheet p.361

Reading and substituting into formulas

Day 15 • 2026-11-25 • 15 questions

02 Use A = L × W for the Shape Canvas rectangle measuring 1200 mm by 800 mm. Find its area.

Shape Canvas

Answer (mm²)	Working / reason

Textbook sections 8.1–8.2 pp.192–194; formula sheet p.361

Reading and substituting into formulas

Day 15 • 2026-11-25 • 15 questions

03 The Numeracy Hub calculator checks P = 2(L + W). For L = 8 and W = 3, which entry keeps the formula’s grouping?

A. 2 + 8 × 3

B. 2 × (8 + 3)

C. 2 × 8 + 3

D. 8 + 3 ÷ 2

Numeracy Hub

Choice (A–D)

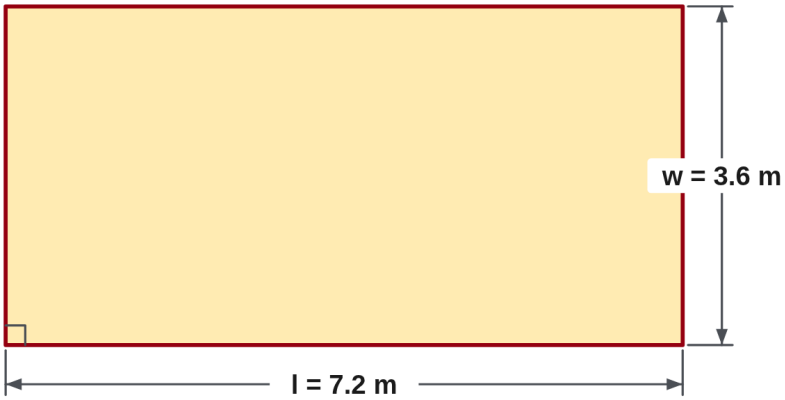

Working / reason

Textbook sections 8.1–8.2 pp.192–194; formula sheet p.361

Reading and substituting into formulas

Day 15 • 2026-11-25 • 15 questions

04 Use P = 2(L + W) for the 7.2 m by 3.6 m Shape Canvas floor. Find P.

Shape Canvas

Answer (m)

Working / reason

Textbook sections 8.1–8.2 pp.192–194; formula sheet p.361

05 What unit belongs to area when L and W are both in metres?

A. m

B. m^3

C. mm

D. m^2

Choice (A–D)

Working / reason

Textbook sections 8.1–8.2 pp.192–194; formula sheet p.361

CALCULATE

06 Use A = L × W when L = 4.5 m and W = 2.2 m.

Answer (m^2)

Working / reason

Textbook sections 8.1–8.2 pp.192–194; formula sheet p.361

Reading and substituting into formulas

Day 15 • 2026-11-25 • 15 questions

07 Use P = 2(L + W) when L = 650 mm and W = 280 mm.

Answer (mm)

Working / reason

Textbook sections 8.1–8.2 pp.192–194; formula sheet p.361

08 Use V = L × W × H when L = 2 m, W = 1.5 m and H = 0.4 m.

Answer (m³)

Working / reason

Textbook sections 8.1–8.2 pp.192–194; formula sheet p.361

09 Use A = b × h / 2 with b = 8 m and perpendicular h = 3 m.

Answer (m²)

Working / reason

Textbook sections 8.1–8.2 pp.192–194; formula sheet p.361

10 Use T = n × l + w with n = 6, l = 350 mm and w = 20 mm. Find T.

Answer (mm)

Working / reason

Textbook sections 8.1–8.2 pp.192–194; formula sheet p.361

Reading and substituting into formulas

Day 15 • 2026-11-25 • 15 questions

APPLY & CHECK

11 A student substitutes into 2(L + W) as 2L + W. What has been missed?

A. The length must be squared

B. The bracket means division

C. The result needs cubic units

D. The width must also be doubled

Choice (A–D)

Working / reason

Textbook sections 8.1–8.2 pp.192–194; formula sheet p.361

12 A floor is 3.5 m by 2800 mm. Use A = L × W and give the area in m².

Answer (m²)

Working / reason

Textbook sections 8.1–8.2 pp.192–194; formula sheet p.361

13 Which result can be a perimeter?

A. 18.4 L

B. 18.4 m

C. 18.4 m²

D. 18.4 m³

Choice (A–D)

Working / reason

Textbook sections 8.1–8.2 pp.192–194; formula sheet p.361

14 Material cost is C = A × p. If A = 12.5 m² and p = $8 per m², find C.

Answer ($)

Working / reason

Textbook sections 8.1–8.2 pp.192–194; formula sheet p.361

Reading and substituting into formulas

Day 15 • 2026-11-25 • 15 questions

15 After calculating a formula, which check is strongest?

A. Accept any calculator display

B. Remove the units

C. Round to one digit before checking

D. Check the substituted values, units and approximate size

Choice (A–D)

Working / reason

Textbook sections 8.1–8.2 pp.192–194; formula sheet p.361
