Review: numbers, units and formulas

Day 25 • 2026-12-14 • 9:00 AM–10:15 AM

15 questions. Show your method and include units. For multiple choice, enter A, B, C or D. Follow your instructor’s calculator guidance.

Name _____ **Date** _____

Type into the fields and save a copy, or print and write.

NUMBER METHODS

01 Calculate the total length of six 725 mm pieces.

Answer (mm) _____ **Working / reason** _____

Textbook Chapter 1–8, selected; formula sheet p.361; conversion factors pp.362–363

02 Calculate 1 3/4 + 2 1/8.

Answer _____ **Working / reason** _____

Textbook Chapter 1–8, selected; formula sheet p.361; conversion factors pp.362–363

Review: numbers, units and formulas

Day 25 • 2026-12-14 • 15 questions

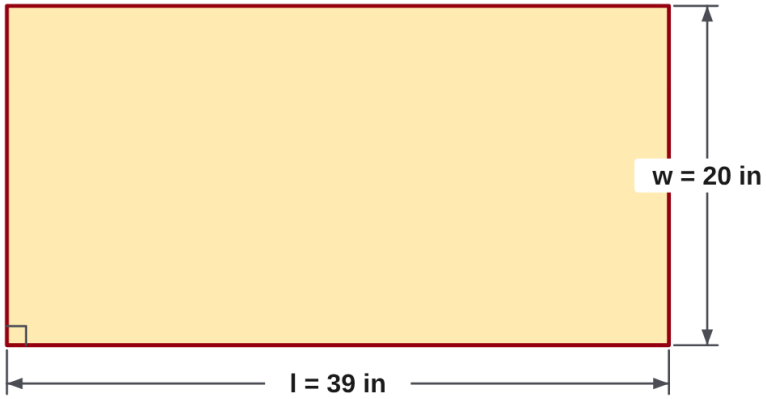

03 Numeracy Hub is used to check 24 − 3 × 5. Which paper method is correct?

A. Multiply all three numbers

B. Add 24 and 3 before multiplying

C. Multiply 3 × 5 before subtracting from 24

D. Subtract 3 from 24 before multiplying

Numeracy Hub

Choice (A–D)

Working / reason

Textbook Chapter 1–8, selected; formula sheet p.361; conversion factors pp.362–363

04 Calculate 5.75 + 2.6 − 1.85.

Answer

Working / reason

Textbook Chapter 1–8, selected; formula sheet p.361; conversion factors pp.362–363

Review: numbers, units and formulas

Day 25 • 2026-12-14 • 15 questions

05 A net length is 64 m. Add a stated 12.5% allowance to find the total.

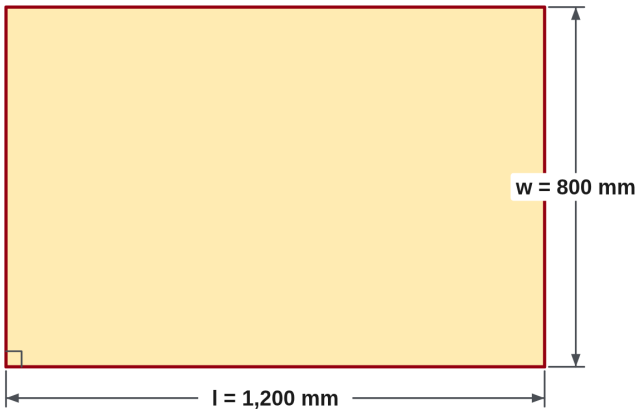

Answer (m)

Working / reason

Textbook Chapter 1–8, selected; formula sheet p.361; conversion factors pp.362–363

UNITS AND FORMULAS

06 Convert the 1200 mm length in the Shape Canvas panel to metres.

Shape Canvas

Answer (m)

Working / reason

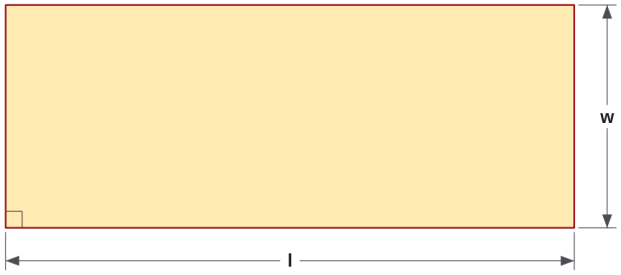

Textbook Chapter 1–8, selected; formula sheet p.361; conversion factors pp.362–363

Review: numbers, units and formulas

Day 25 • 2026-12-14 • 15 questions

07 Convert the 18.5-inch length shown into millimetres using 25.4 mm per inch.

l = 18½ in **w = 7¼ in**

Shape Canvas

Answer (mm) **Working / reason**

Textbook Chapter 1–8, selected; formula sheet p.361; conversion factors pp.362–363

08 A 1:20 drawing shows a length of 65 mm. Find the full-size length in millimetres.

Answer (mm) **Working / reason**

Textbook Chapter 1–8, selected; formula sheet p.361; conversion factors pp.362–363

09 A rectangle has area 32 m² and width 4 m. Find its length.

Answer (m) **Working / reason**

Textbook Chapter 1–8, selected; formula sheet p.361; conversion factors pp.362–363

Review: numbers, units and formulas

Day 25 • 2026-12-14 • 15 questions

10 Use A = L × W for a rectangle with L = 4.5 m and W = 2 m. Find A.

Answer (m²)

Working / reason

Textbook Chapter 1–8, selected; formula sheet p.361; conversion factors pp.362–363

CHECK THE RESULT

11 A learner gets 120 mm when converting 1.2 m. Which check catches the error?

A. One metre is already 1000 mm, so 1.2 m must exceed 1000 mm

B. The answer has three digits

C. The number is even

D. The display is clear

Choice (A–D)

Working / reason

Textbook Chapter 1–8, selected; formula sheet p.361; conversion factors pp.362–363

12 Which equation checks a width found from area and length?

A. Length + width = original area

B. Area × width = original length

C. Width ÷ area = original perimeter

D. Length × calculated width = original area

Choice (A–D)

Working / reason

Textbook Chapter 1–8, selected; formula sheet p.361; conversion factors pp.362–363

Review: numbers, units and formulas

Day 25 • 2026-12-14 • 15 questions

13 A calculated width is 5 m and length is 8 m. What perimeter checks the result?

Answer (m)

Working / reason

Textbook Chapter 1–8, selected; formula sheet p.361; conversion factors pp.362–363

14 What is a good estimate for 49 × 21 before using a calculator?

A. About 10

B. About 1000

C. About 100

D. About 10000

Choice (A–D)

Working / reason

Textbook Chapter 1–8, selected; formula sheet p.361; conversion factors pp.362–363

15 The exact product 49 × 21 is how much greater than the estimate 1000?

Answer

Working / reason

Textbook Chapter 1–8, selected; formula sheet p.361; conversion factors pp.362–363
