Review: geometry and job problems

Day 25 • 2026-12-14 • 10:30 AM–12:00 PM

15 questions. Show your method and include units. For multiple choice, enter A, B, C or D. Follow your instructor’s calculator guidance.

Name _____ **Date** _____

Type into the fields and save a copy, or print and write.

CHOOSE GEOMETRY

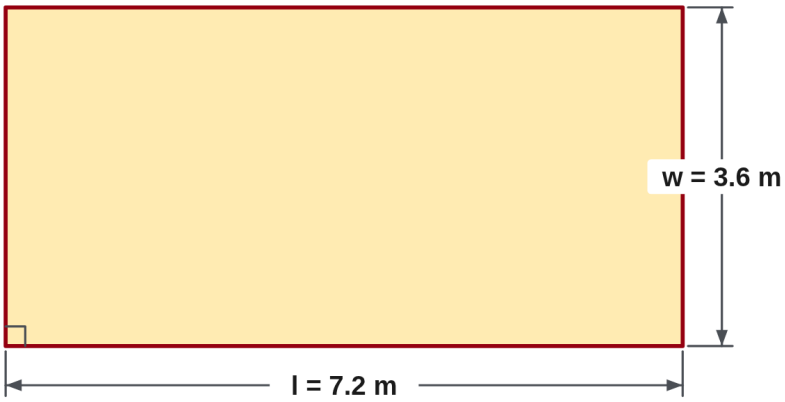

01 The shown floor needs edge trim. Which formula applies?

A. P = 2(L + W)

B. A = L × W

C. V = L × W × H

D. C = 2πr

Shape Canvas

Choice (A–D)

Working / reason

Textbook Chapter 9–13 pp.220–339, selected; formula sheet p.361

Review: geometry and job problems

Day 25 • 2026-12-14 • 15 questions

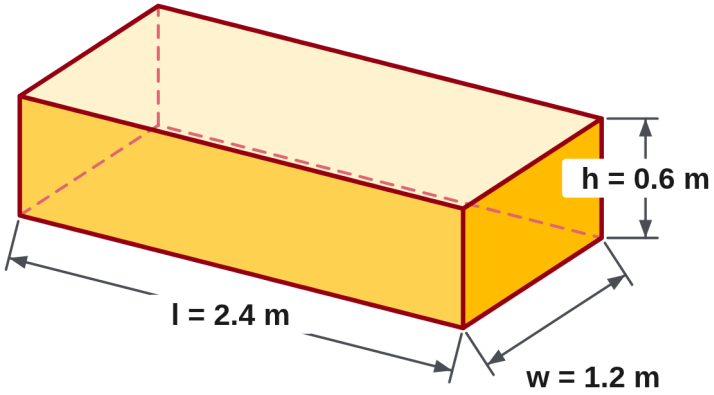

02 The shown rectangular prism is being filled. Which quantity is needed?

A. Perimeter

B. Angle total

C. Circumference

D. Volume

Shape Canvas

Choice (A–D)

Working / reason

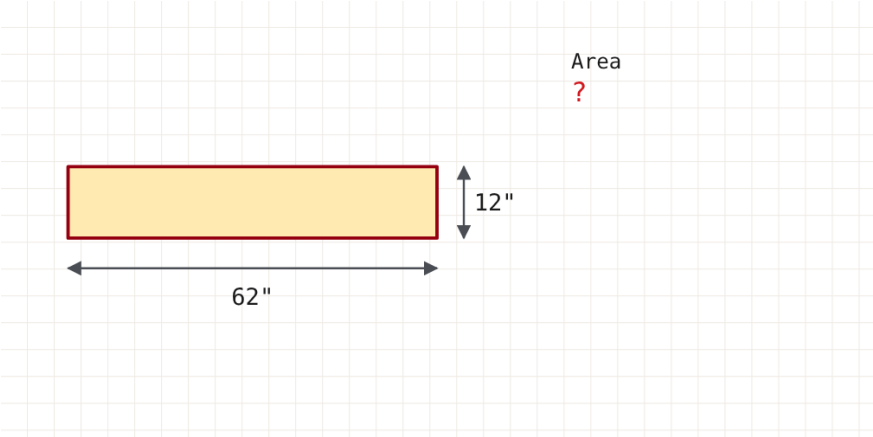

Textbook Chapter 9–13 pp.220–339, selected; formula sheet p.361

Review: geometry and job problems

Day 25 • 2026-12-14 • 15 questions

03 Numeracy Hub displays an area/perimeter diagram. Which unit describes surface coverage?

A. m³
B. degrees
C. m²
D. m

Numeracy Hub

Choice (A–D)

Working / reason

Textbook Chapter 9–13 pp.220–339, selected; formula sheet p.361

04 A brace crosses a rectangular panel diagonally. Which method finds its length from the two side dimensions?

A. Divide perimeter by volume
B. Pythagorean theorem
C. Add the surface areas
D. Use the triangle angle total alone

Choice (A–D)

Working / reason

Textbook Chapter 9–13 pp.220–339, selected; formula sheet p.361

Review: geometry and job problems

Day 25 • 2026-12-14 • 15 questions

05 For a cylinder, which two measurements determine $V = \pi r^2 h$?

A. Radius and height

B. Diameter and circumference only

C. Perimeter and angle

D. Screen width and screen height

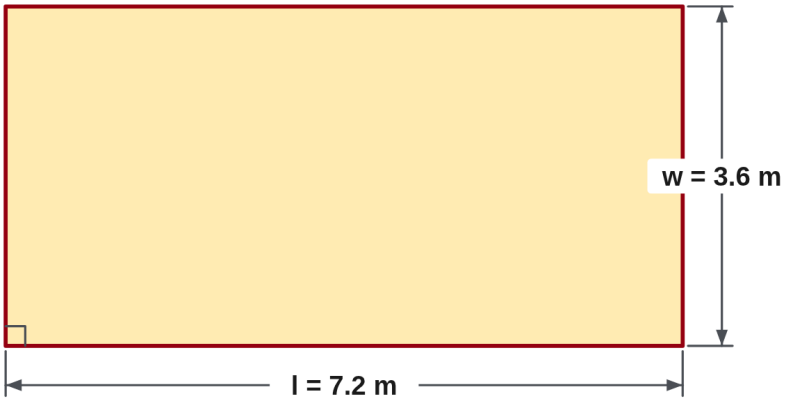

Choice (A–D)

Working / reason

Textbook Chapter 9–13 pp.220–339, selected; formula sheet p.361

SOLVE THE JOB

06 Calculate the perimeter of the 7.2 m by 3.6 m floor shown.

Shape Canvas

Answer (m)

Working / reason

Textbook Chapter 9–13 pp.220–339, selected; formula sheet p.361

07 A wall is 5 m by 2.4 m with a 1.8 m² opening. Find its net area.

Answer (m²)

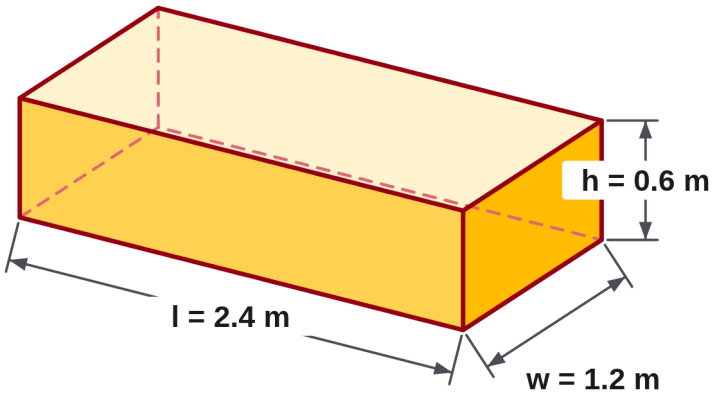

Working / reason

Textbook Chapter 9–13 pp.220–339, selected; formula sheet p.361

Review: geometry and job problems

Day 25 • 2026-12-14 • 15 questions

08 Find the volume of the shown prism: 2.4 m by 1.2 m by 0.6 m.

Shape Canvas

Answer (m³)

Working / reason

Textbook Chapter 9–13 pp.220–339, selected; formula sheet p.361

09 A right triangle has legs of 8 m and 15 m. Find its hypotenuse.

Answer (m)

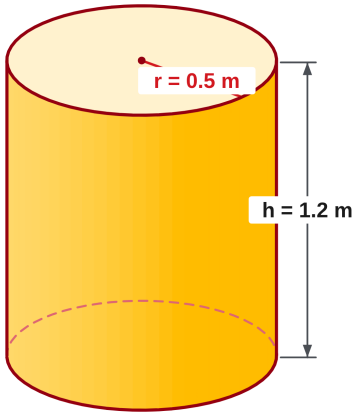

Working / reason

Textbook Chapter 9–13 pp.220–339, selected; formula sheet p.361

Review: geometry and job problems

Day 25 • 2026-12-14 • 15 questions

10 The cylinder shown has radius 0.5 m and height 1.2 m. Use pi = 3.14 to find its volume.

Shape Canvas

Answer (m³)

Working / reason

Textbook Chapter 9–13 pp.220–339, selected; formula sheet p.361

CHECK UNITS AND FIT

11 A box-volume calculation is labelled m². What must change?

A. Use m³ for the volume unit

B. Use degrees

C. Use percent

D. Keep m² because the box has a base

Choice (A–D)

Working / reason

Textbook Chapter 9–13 pp.220–339, selected; formula sheet p.361

Review: geometry and job problems

Day 25 • 2026-12-14 • 15 questions

12 A 1.728 m³ volume must be expressed in litres. Use 1000 L per m³.

Answer (L)

Working / reason

Textbook Chapter 9–13 pp.220–339, selected; formula sheet p.361

13 The radius is 0.5 m but a learner substitutes 1 m into πr²h. Which mistake occurred?

A. The perimeter was found correctly

B. The angle mode was changed

C. The diameter was used as the radius

D. The height was converted correctly

Choice (A–D)

Working / reason

Textbook Chapter 9–13 pp.220–339, selected; formula sheet p.361

14 From 3000 mm stock, cut two 1200 mm pieces using two 3 mm kerfs. What offcut remains?

Answer (mm)

Working / reason

Textbook Chapter 9–13 pp.220–339, selected; formula sheet p.361

Review: geometry and job problems

Day 25 • 2026-12-14 • 15 questions

15 A diagonal is shorter than the rectangle’s longest side. What does this show?

A. The calculation or measurement needs checking

B. The answer is always valid

C. The rectangle must have negative area

D. A shorter diagonal is required by the formula

Choice (A–D)	Working / reason

Textbook Chapter 9–13 pp.220–339, selected; formula sheet p.361
