Day 03 | Monday

03

November 2, 2026

BEDMAS: choosing the correct order

12:45 PM–2:00 PM • Math • 75 min

BEDMAS in cut lists and frames

2:15 PM–3:30 PM • Math • 75 min

Week 2 • 2 scheduled blocks • 150 teaching minutes

Estimate. Show the method. Label units. Check the result.

Today’s exact schedule

12:45 PM–2:00 PM • 75 min

BEDMAS: choosing the correct order

12:45 PM–12:50 PM	**Start**	5
12:50 PM–12:55 PM	**Recall**	5
12:55 PM–1:10 PM	**Teach**	15
1:10 PM–1:25 PM	**Together**	15
1:25 PM–1:45 PM	**Practise**	20
1:45 PM–1:55 PM	**Check**	10
1:55 PM–2:00 PM	**Wrap up**	5

Math • Math Week 2, Lesson 1

2:15 PM–3:30 PM • 75 min

BEDMAS in cut lists and frames

2:15 PM–2:20 PM	**Start**	5
2:20 PM–2:25 PM	**Recall**	5
2:25 PM–2:40 PM	**Teach**	15
2:40 PM–2:55 PM	**Together**	15
2:55 PM–3:15 PM	**Practise**	20
3:15 PM–3:25 PM	**Check**	10
3:25 PM–3:30 PM	**Wrap up**	5

Math • Math Week 2, Lesson 2

Break: 2:00 PM–2:15 PM • 15 minutes • excluded from teaching time

BEDMAS: choosing the correct order

Today’s goal: Evaluate grouped expressions and show left-to-right order for equal-ranked operations.

Name one use for today’s skill.

Textbook Chapter 3 pp.68–75; Chapter 2 pp.51–53

Exercise Book 3A Q1–10 (p.25); 3B Q2–3 (p.27)

Keep your notebook, textbook, exercise book and chosen calculator ready.

Textbook Chapter 3 pp.68–75; Chapter 2 pp.51–53

Recall and reconnect

Compare Exercise Book 3A Q1 and Q4. Identify what changes when brackets are present.

Try first without displayed answers.

Resources: Exercise Book 3A Q1–10 (p.25); 3B Q2–3 (p.27)

Textbook Chapter 3 pp.68–75; Chapter 2 pp.51–53

Recall from the Exercise Book | 3A Q1

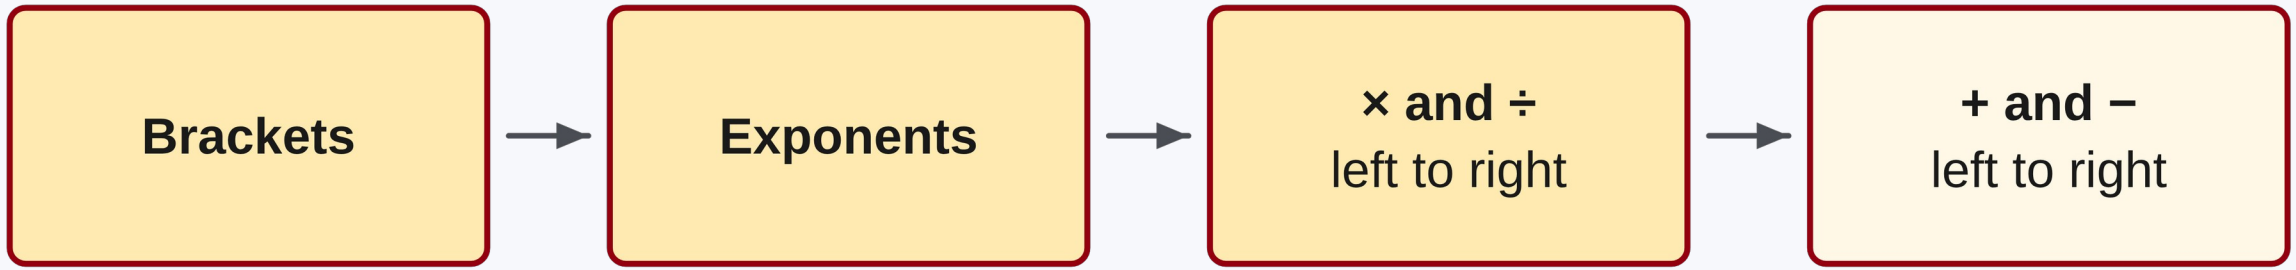

$$9 + 6 \times 4$$

Write the operation, working and units before checking.

Textbook Chapter 3 pp.68–75; Chapter 2 pp.51–53

Read BEDMAS as ranked operations

1. Complete the calculation inside brackets first.
2. Evaluate exponents before multiplication or division.
3. Multiplication and division share one rank: work from left to right.
4. Addition and subtraction share one rank: work from left to right.

Textbook Chapter 3 pp.68–75; Chapter 2 pp.51–53

Make the next operation visible

1 Copy the expression exactly, including every bracket.

2 Mark the operation you will perform next.

3 Rewrite the expression after each step; carry unchanged terms forward.

4 Match the calculator’s grouping to the written expression.

$$9 + \boxed{6 \times 4}$$ **next operation: ×**

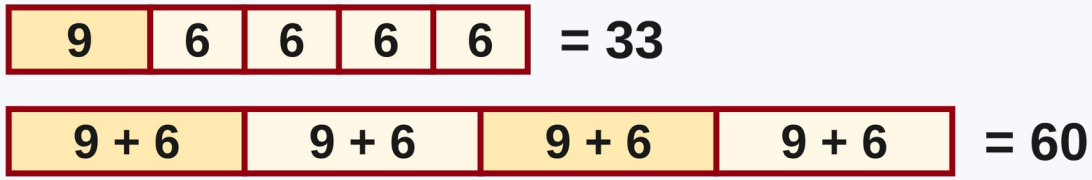

$$= \boxed{9 + 24}$$ **9 + carried forward**

$$= 33$$

Textbook Chapter 3 pp.68–75; Chapter 2 pp.51–53

Point to the next operation first

$9 + 6 \times 4 = 9 + 24 = 33$
$(9 + 6) \times 4 = 15 \times 4 = 60$

$24 \div 6 \times 2 = 4 \times 2 = 8$

The last line uses left-to-right order. Do not multiply 6 × 2 first.

Together • Exercise Book 3A Q2–7.
Point to the next operation before calculating. In Numeracy Hub, select Order of Operations → The order: BEDMAS; compare Show steps with your written working.

Textbook | page 68

Letter	Stands for	Example
B	Brackets ( ) and [ ]	(12 + 8) × 3: add 12 + 8 first
E	Exponents: squares, powers and roots	100 − 5^2: work out 5^2 first
D and M	Division and Multiplication, left to right	24 ÷ 4 × 3: divide first, because ÷ comes first
A and S	Addition and Subtraction, left to right	20 − 8 + 2: subtract first, because − comes first

Table 3.1 What each letter of BEDMAS means.

Textbook p.68 · Table 3.1: BEDMAS has four ranks, with left-to-right ties.

Textbook Chapter 3 pp.68–75; Chapter 2 pp.51–53

Textbook | page 68

Example 3.1 Bolts in a crate

A crate holds 3 loose bolts and 4 bags of 5 bolts. The count is written 3 + 4 × 5. How many bolts are in the crate?

SOLUTION

1. The 4 bags of 5 bolts are 4 × 5 = 20 bolts. That multiplication has to happen first.
2. Add the loose bolts: 3 + 20 = 23.
3. Adding first, 3 + 4 = 7 and 7 × 5 = 35, counts the 3 loose bolts as if they were in bags. That is wrong.

Textbook p.68 · Example 3.1: loose bolts plus equal groups.

Textbook Chapter 3 pp.68–75; Chapter 2 pp.51–53

Spot the mistake. Explain the correction.

In 24 ÷ 6 × 2, should you multiply 6 × 2 first because multiplication appears in BEDMAS?

Discuss the method before checking the answer.

No. Division and multiplication have equal rank. Work left to right: 24 ÷ 6 = 4, then 4 × 2 = 8.

Textbook Chapter 3 pp.68–75; Chapter 2 pp.51–53

Work together

Solve Exercise Book 3A Q2–7 with a partner. Point to the next operation before calculating.

Work in pairs; alternate solver and checker.

Resources: Exercise Book 3A Q1–10 (p.25); 3B Q2–3 (p.27)

Textbook Chapter 3 pp.68–75; Chapter 2 pp.51–53

Guided practice | 3A Q2

$50 - 18 \div 3$

$50 - \boxed{18 \div 3}$ **next operation: ÷**

$= 50 - \boxed{?}$ **50 − carried forward**

$= \boxed{?}$

Work with a partner. Take turns explaining the next step.

Textbook Chapter 3 pp.68–75; Chapter 2 pp.51–53

Compare your method | 3A Q2

$$50 - 18 \div 3$$

CHECK TOGETHER

44

Textbook Chapter 3 pp.68–75; Chapter 2 pp.51–53

Your scheduled practice

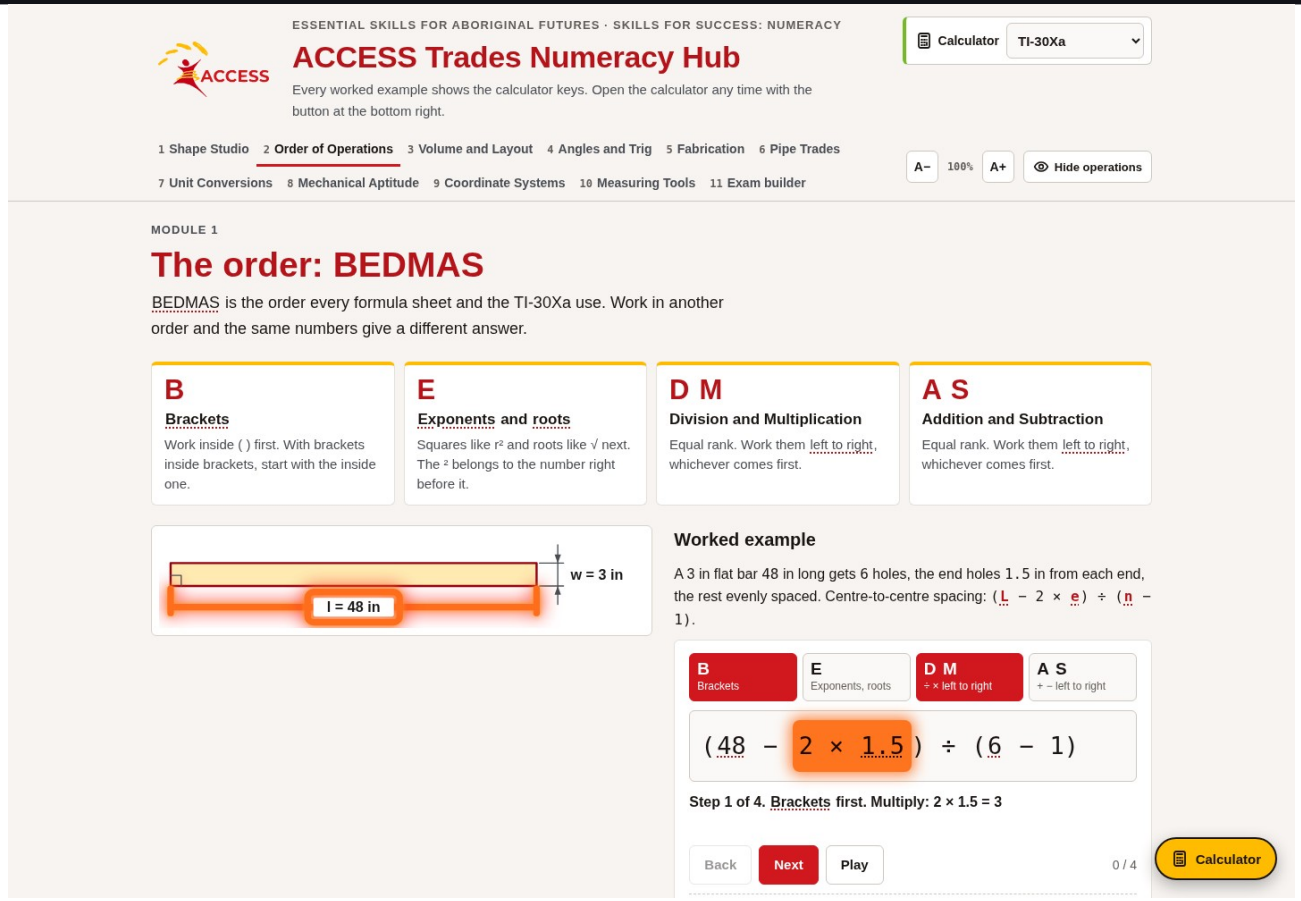

Complete Exercise Book 3A Q8–10 and 3B Q2–3. Try two Level 1 Numeracy Hub tasks; record expression, order and checked result, not only the screen answer.

Show working and units; estimate, then check.

Resources: Exercise Book 3A Q1–10 (p.25); 3B Q2–3 (p.27)

Textbook Chapter 3 pp.68–75; Chapter 2 pp.51–53

Open Numeracy Hub

Navigation example. Use the values and units in the assigned task.

Textbook Chapter 3 pp.68–75; Chapter 2 pp.51–53

Practise in Numeracy Hub

1. Supported: Open Numeracy Hub → Order of Operations → The order: BEDMAS.

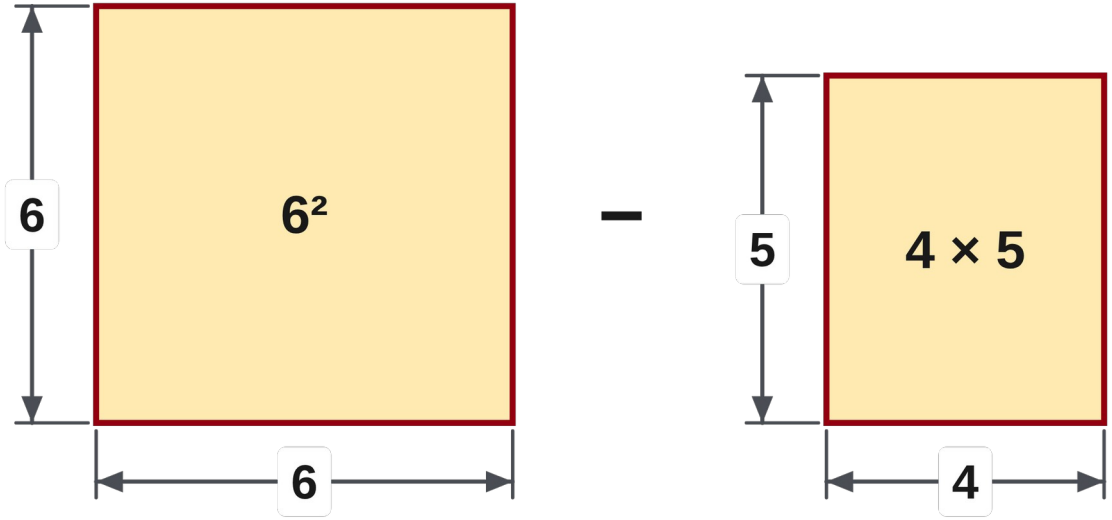

2. Supported: Predict the next operation; use Show steps, Next and Back to compare with your working.

3. Independent practice: Attempt two Level 1 tasks on paper first; keep the expression and operation order.

Textbook Chapter 3 pp.68–75; Chapter 2 pp.51–53

Practise from the Exercise Book | 3A Q8

$6^2 - 4 \times 5$

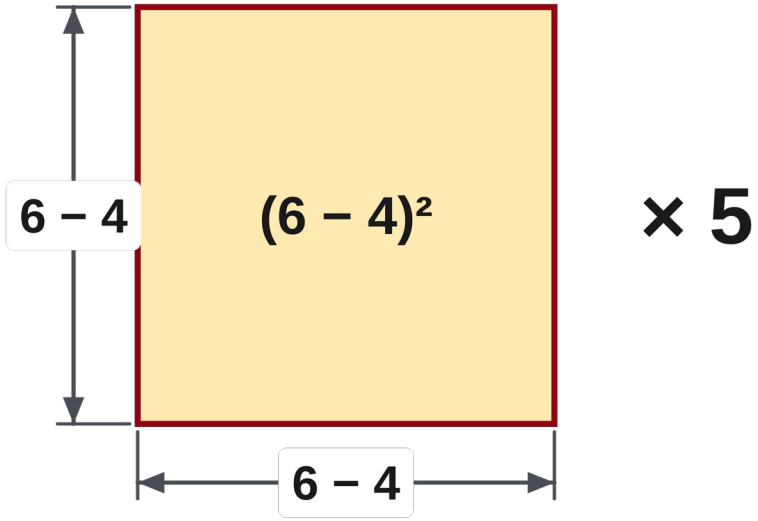

Write the operation, working and units before checking.

Textbook Chapter 3 pp.68–75; Chapter 2 pp.51–53

Practise from the Exercise Book | 3A Q9

$(6 - 4)^2 \times 5$

Write the operation, working and units before checking.

Textbook Chapter 3 pp.68–75; Chapter 2 pp.51–53

Check independently

Exercise Book 3A Q8–9 without displayed solutions; mark each operation in order.

Answer independently and show the method.

Resources: Exercise Book 3A Q1–10 (p.25); 3B Q2–3 (p.27)

Textbook Chapter 3 pp.68–75; Chapter 2 pp.51–53

Independent check | 3A Q8

$6^2 - 4 \times 5$

Answer independently. Keep worked solutions closed.

Textbook Chapter 3 pp.68–75; Chapter 2 pp.51–53

Independent check | 3A Q9

$$(6 - 4)^2 \times 5$$

Answer independently. Keep worked solutions closed.

Textbook Chapter 3 pp.68–75; Chapter 2 pp.51–53

Wrap up and choose the next step

Share one learning point and one skill to practise next.

Record a takeaway and next action.

Resources: Exercise Book 3A Q1–10 (p.25); 3B Q2–3 (p.27)

Textbook Chapter 3 pp.68–75; Chapter 2 pp.51–53

Break

2:00 PM–2:15 PM

Return ready for: BEDMAS in cut lists and frames

This break is excluded from teaching minutes.

BEDMAS in cut lists and frames

Today’s goal: Write one correct expression for a cut list or frame and evaluate it in the right order.

Name one use for today’s skill.

Textbook Chapter 3 pp.68–75

Exercise Book 3B Q1–3 (p.27); 3C Q2–3 (p.29)

Keep your notebook, textbook, exercise book and chosen calculator ready.

Textbook Chapter 3 pp.68–75

Recall and reconnect

Compare 2 × (10 + 5) with 2 × 10 + 5. Try to explain the grouping.

Try first without displayed answers.

Resources: Exercise Book 3B Q1–3 (p.27); 3C Q2–3 (p.29)

Textbook Chapter 3 pp.68–75

Make brackets represent the drawing

1. Repeated pieces become number of pieces × length per piece.
2. Group every quantity that must be removed from the original stock.
3. Count only the cuts and kerf explicitly stated in the problem.
4. Offcut = stock − (all piece lengths + all stated cutting loss).

Textbook Chapter 3 pp.68–75

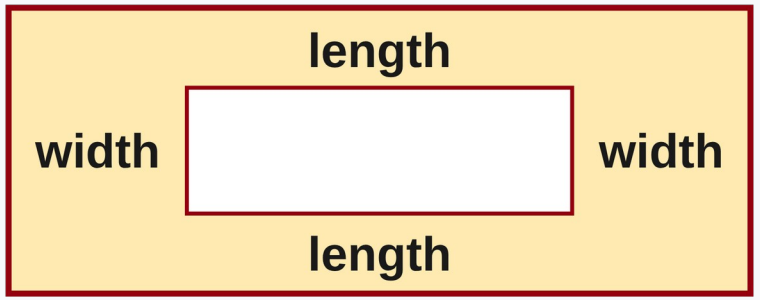

Frames count pairs of sides

1 A rectangle has two lengths and two widths.

2 Adding four sides and calculating 2 × (length + width) count the same boundary.

3 In 2 × (length + width), the 2 multiplies both dimensions.

4 Keep the sketch, expression and measurement unit attached to the same problem.

2 × (length + width)

Textbook Chapter 3 pp.68–75

Subtract the entire amount used

Classroom example: 3,000 mm stock; two 850 mm pieces;
two stated cuts, each with 3 mm kerf.

Offcut = 3,000 − (2 × 850 + 2 × 3)
= 3,000 − 1,706 = 1,294 mm

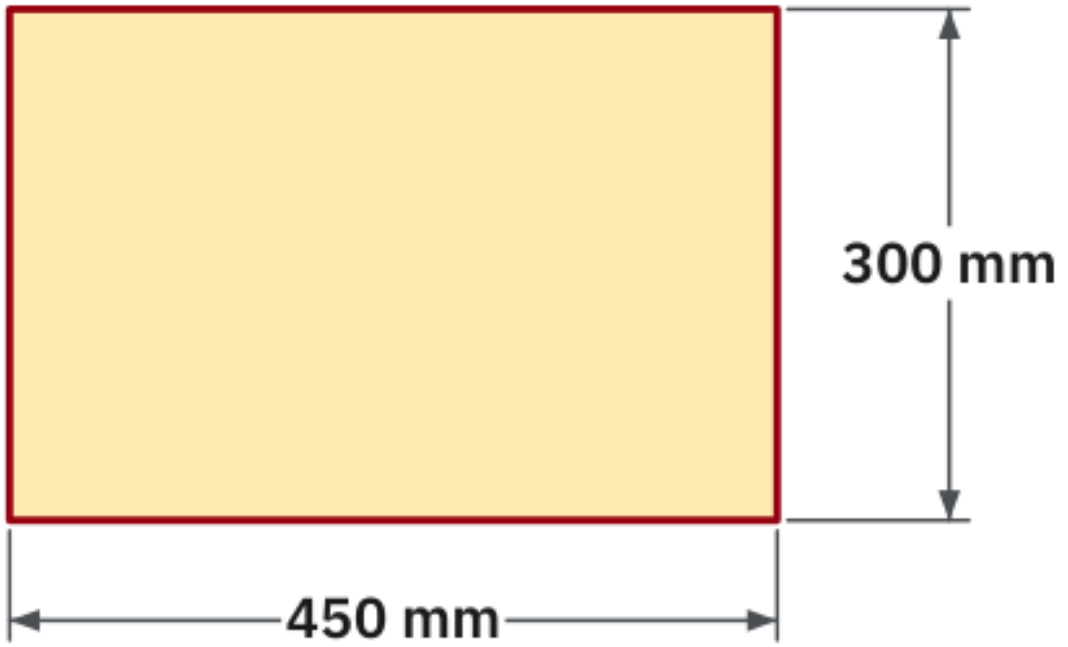

Check: 1,700 mm pieces + 6 mm kerf + 1,294 mm offcut = 3,000 mm.

Together • Exercise Book 3B Q1–2.
Underline the group before entering keys. Draw the pieces and label what each number counts.

W2 L2 • Numeracy Hub BEDMAS: Show steps after written work • Kerf is stated example data

Textbook | page 70

Textbook p.70 · Frame diagram: two lengths and two widths.

Textbook Chapter 3 pp.68–75

Textbook | page 70

Example 3.3 Brackets change the answer

Find 12 + 8 × 3 and (12 + 8) × 3.

SOLUTION

1. 12 + 8 × 3: multiply first, 8 × 3 = 24, then 12 + 24 = 36.
2. (12 + 8) × 3: brackets first, 12 + 8 = 20, then 20 × 3 = 60.

Textbook p.70 · Example 3.3: brackets change what is multiplied.

Textbook Chapter 3 pp.68–75

Spot the mistake. Explain the correction.

Does stock − pieces + kerf subtract the cutting loss?

Discuss the method before checking the answer.

No. It adds kerf back. Subtract the full group: stock − (pieces + kerf).

Textbook Chapter 3 pp.68–75

Work together

Solve 3B questions 1–2. Underline the group inside brackets before entering keys.

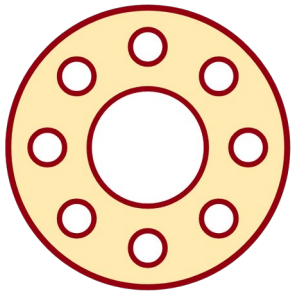

Work in pairs; alternate solver and checker.

Resources: Exercise Book 3B Q1–3 (p.27); 3C Q2–3 (p.29)

Textbook Chapter 3 pp.68–75

Guided practice | 3B Q1

A spool piece has 6 flanges with 8 bolts each. You also want 4 spare bolts. Write one calculation for the bolts needed and work it out.

1 flange: 8 bolts

× 6 flanges **+ 4 spare bolts** Bolts needed **?**

Work with a partner. Take turns explaining the next step.

Textbook Chapter 3 pp.68–75

Compare your method | 3B Q1

A spool piece has 6 flanges with 8 bolts each. You also want 4 spare bolts. Write one calculation for the bolts needed and work it out.

CHECK TOGETHER

6 × 8 + 4 = 52 bolts

Textbook Chapter 3 pp.68–75

Your scheduled practice

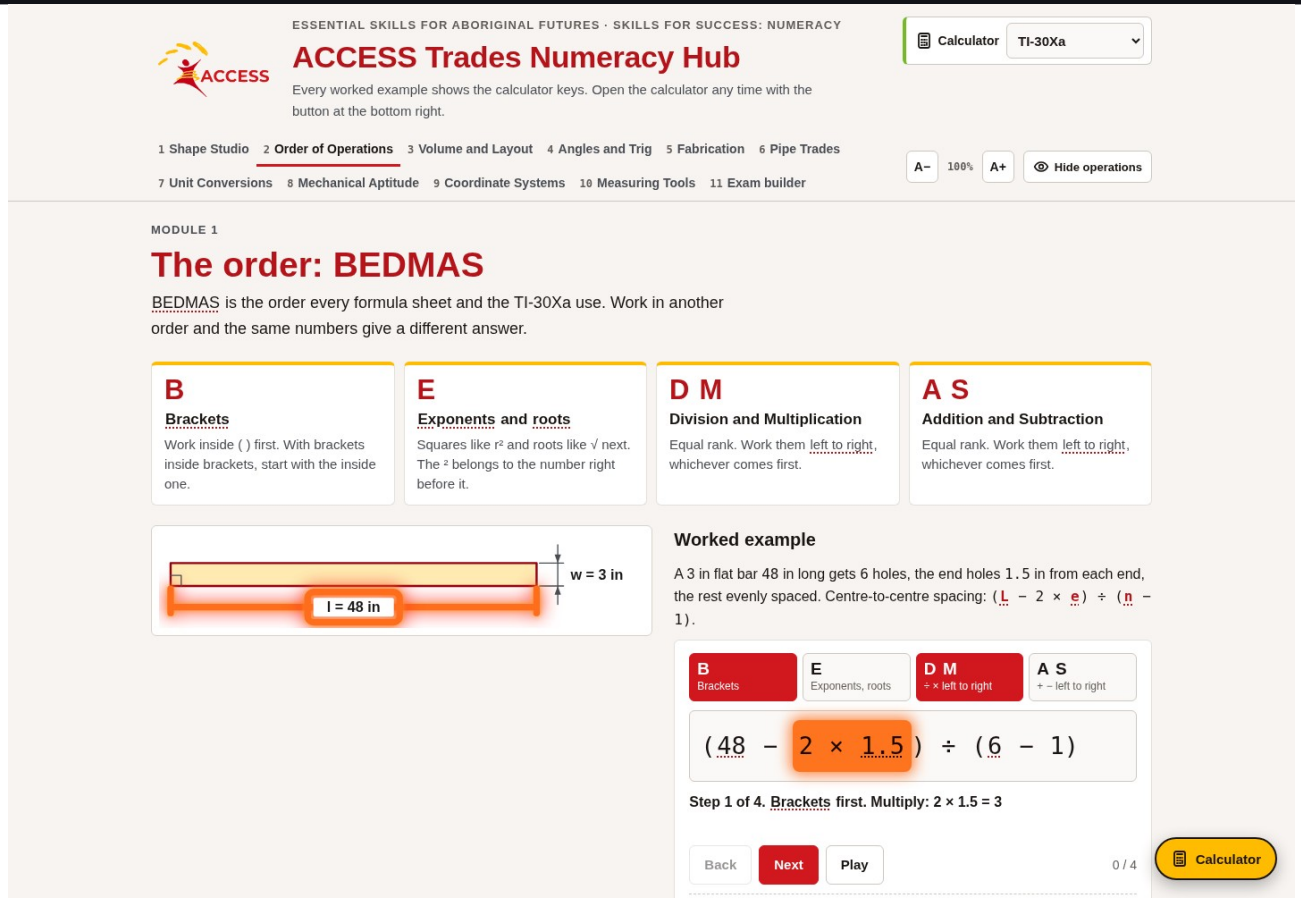

Complete 3B question 3 and 3C questions 2–3. Draw the pieces, write one expression and compare with the Numeracy Hub steps.

Show working and units; estimate, then check.

Resources: Exercise Book 3B Q1–3 (p.27); 3C Q2–3 (p.29)

Textbook Chapter 3 pp.68–75

Open Numeracy Hub

Navigation example. Use the values and units in the assigned task.

Textbook Chapter 3 pp.68–75

Practise in Numeracy Hub

1. Supported: Draw and label the pieces or frame for the assigned question; write one expression.

2. Independent practice: Complete the paper calculation and underline the grouped quantity.

3. Independent checking: Open Numeracy Hub BEDMAS and compare Show steps with the written order.

Textbook Chapter 3 pp.68–75

Practise from the Exercise Book | 3B Q3

Four 27 in pieces and two 15 in pieces are cut from a 144 in bar. Ignore the saw cuts. The offcut is 144 − (4 × 27 + 2 × 15). Find it.

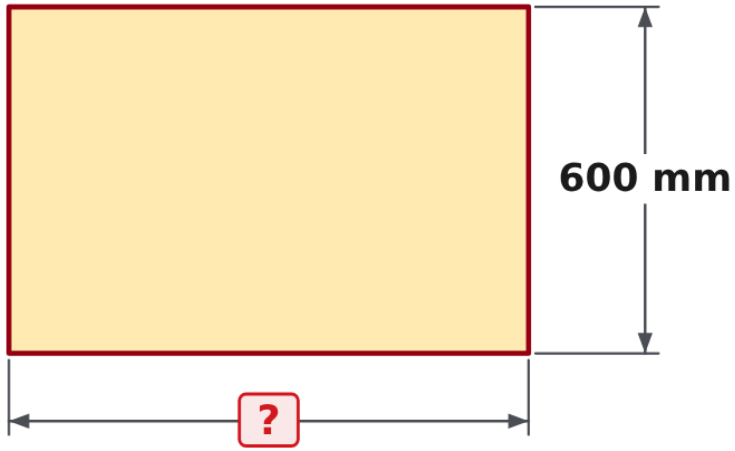

Write the operation, working and units before checking.

Textbook Chapter 3 pp.68–75

Practise from the Exercise Book | 3C Q2

The distance around this frame is 3,000 mm. Find the hidden length with $L = 3{,}000 \div 2 - 600$.

Write the operation, working and units before checking.

Textbook Chapter 3 pp.68–75

Check independently

Redo 3C questions 2–3 and explain the brackets.

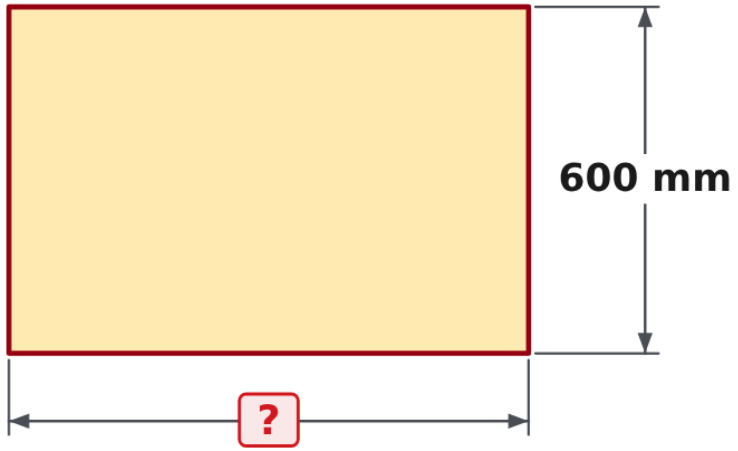

Answer independently and show the method.

Resources: Exercise Book 3B Q1–3 (p.27); 3C Q2–3 (p.29)

Textbook Chapter 3 pp.68–75

Independent check | 3C Q2

The distance around this frame is 3,000 mm. Find the hidden length with $L = 3{,}000 \div 2 - 600$.

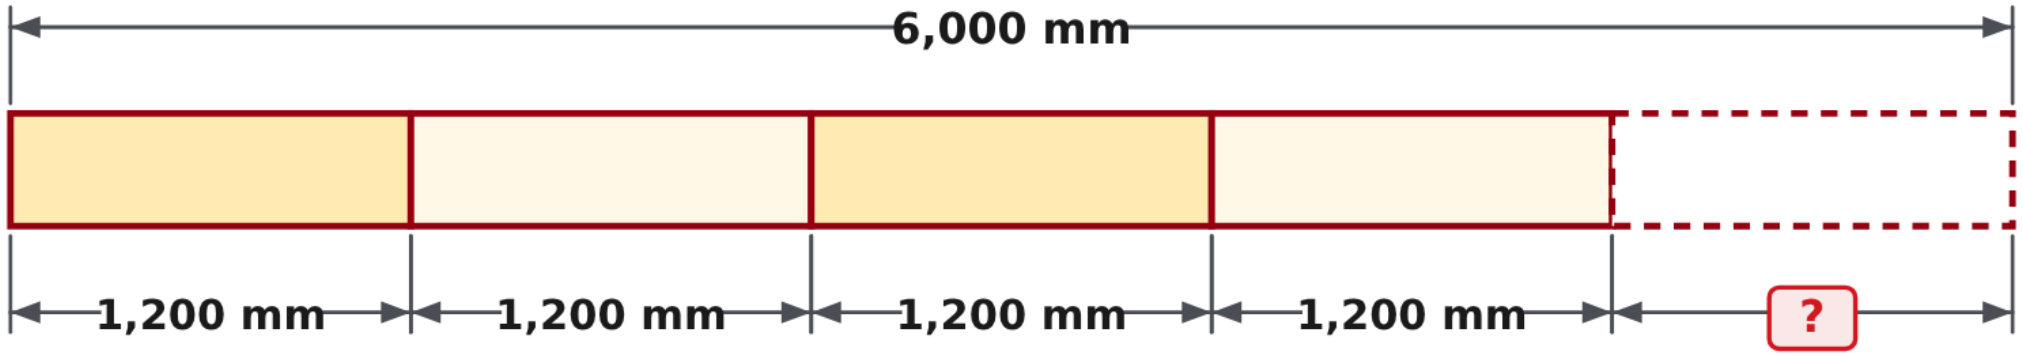

Answer independently. Keep worked solutions closed.

Textbook Chapter 3 pp.68–75

Independent check | 3C Q3

Four 1,200 mm pieces are cut from a 6,000 mm bar with four cuts. The kerf is 3 mm. The offcut is 6,000 − (4 × 1,200 + 4 × 3). Find it.

Answer independently. Keep worked solutions closed.

Textbook Chapter 3 pp.68–75

Wrap up and choose the next step

Share one learning point and one skill to practise next.

Record a takeaway and next action.
